Email id : sarathpandian2025@gmail.com

Mobile Number: 8870907612

CAREER OBJECTIVE

Motivated engineering graduate with knowledge in Embedded Systems, Internet of Things (IoT), and emerging skills in AI development and architecture. Seeking an opportunity to apply my technical skills in designing intelligent embedded solutions, developing connected devices, and contributing to innovative technology projects while continuously expanding my expertise

EDUCATION

Mount Zion College of Engineering and Technology

B.E Electronics and Communication Engineering

Pudukkottai, Tamil Nadu, India

CGPA: 7.65 (upto 7th sem)

Nov 2022 – May 2026

SKILLS SUMMARY

- Programming: Python, C, Embedded C
- Embedded Platforms: Arduino IDE, keil
- PCB Design: Eagle, EasyEDA, Circuit Wizard
- Simulation Tools: Proteus, Wokwi
- IoT Platforms: ThingSpeak, Blynk IoT
- Data Tools: Power BI

INTERNSHIP

Enthu Technology Solutions India Pvt Ltd.,

Coimbatore, Tamil Nadu, India

Jul 2025 - Aug 2025

- Completed a 4-week internship focused on IoT systems and PCB fabrication.
- Designed and prototyped IoT-based circuits integrating both hardware and firmware.
- Gained practical experience in PCB design, fabrication, and testing.
- Strengthened skills in real-world IoT applications and circuit troubleshooting.

SMNG Academy

Karaikudi, Tamil Nadu, India

Feb 2024

- Gained hands-on experience in Embedded System and iot, PCB design and fabrication.
- Worked on schematic capture, PCB layout, and prototyping using industry-standard tools.
- Gained practical experience in Embedded system and iot and testing.
- Strengthened skills in real-world IoT applications and circuit troubleshooting.

CERTIFICATION

- **Deloitte Australia – Technology Job Simulation** Issued Dec 2025
Forage Credential ID: FrduPEoPn7Nd2yZc8
- **Certificate of Completion: Network Technician Career Path** October 29, 2024
Cisco Networking Academy
- **Introduction to Data Engineering and Big Data** Issued Sep 2024
GUVI Geek Networks, IITM Research Park
Credential ID: 060j279u2Wx11v977Z
- **Python 3.x Programming Course (Hands-on)** Issued Jan 2023
Skillrack

PROJECTS

IoT-Based Patient Health Monitoring System

- Developed a real-time patient monitoring solution using **Esp 32**, **MAX30100 sensor**, **DHT11 sensor**, and **Blynk IoT platform**.
- Measured **heart rate**, **SpO₂**, and **body temperature** with data transmitted to a mobile dashboard in real-time.

Design and Implementation of a Dual-Axis Solar Tracking System Using Arduino Nano

- Designed an **Arduino Nano-based dual-axis solar tracking system** using LDR sensors and servo motors.
- Enabled solar panels to stay perpendicular to sunlight, increasing energy efficiency by 30–40% compared to fixed panels.

Smart Trolley – Automated RFID Billing System

- Proposed an **RFID-based smart trolley** to automate supermarket billing and reduce checkout time.
- Integrated RFID readers with backend for **real-time billing, inventory management, and theft prevention**.

IoT Enabled Solar Powered Weather Monitoring System

- Designed an **ESP32-based IoT weather monitoring system** using DHT22, BMP280, rain, and LDR sensors for real-time environmental data collection.
- Implemented **solar-powered operation with cloud data storage using Firebase**, enabling remote monitoring through web and mobile dashboards.
- Integrated **LCD display and Wi-Fi communication** to transmit weather data to the cloud every 30 seconds for continuous monitoring.

ACHIEVEMENT

Presented a paper titled “**IoT Enabled Solar Powered Weather Monitoring System**” at the **7th International Conference on Recent Trends in Engineering and Technology (ICRTET-2026)** organized by Mount Zion College of Engineering and Technology, Pudukkottai, in April 2026.
